1 Grid is enabled

This paragraph should use the grid baseline. It contains enough words to wrap over more than one line and show the spacing.

$$a^2 + b^2 = c^2 \tag{1}$$

Paragraph after display math should return to grid alignment.

2 Locally disabled in a group

This text is inside a local group with automatic grid correction switched off. It should use the font's natural baseline and native title spacing and list spacing.

- One list item with enough text to wrap onto another line and show natural line spacing.
- Second item.

$$x^2 + y^2 = z^2 \tag{2}$$

3 Grid restored after group

This paragraph should return to grid alignment after the disabled group.

4 Locally disabled in environment

This text is inside the gridautoff environment. Automatic grid correction is disabled here.

1. First item.
2. Second item.

$$E = mc^2 \tag{3}$$

5 Grid restored after environment

This paragraph should return to grid alignment after the environment.
