Chapter 1

Chapter before normal body

The first paragraph after chapter should land on grid. It contains multiple sentences to wrap to multiple lines and demonstrate baseline alignment with the grid. One more sentence to fill lines.

$$a^2 + b^2 = c^2 \tag{1.1}$$

1.1 Section after equation with no native spacing

Text after section should land on grid. It contains some more sentences to wrap into multiple lines and demonstrate whether the first baseline is aligned with the red grid.

- List item one with enough text to wrap to another line. There is also more text.
- Item two.

1.2 Section after list

Text after section after list should align to grid. More text to wrap.

1.2.1 Subsection after section

Text after subsection should align to grid.

Subsubsection

Text after subsubsection should align to grid.

Paragraph run in heading. This body text shares the line and should be on grid.

Subparagraph heading. This body text shares the line too.
