Chapter 1

Main chapter

Main body before included content.

1.1 Included section

Included body with a few lines to measure phase correction. It contains enough words to create a stable block of text.

$$a^2 + b^2 = c^2 \tag{1.1}$$

1.1.1 Added inside included file

This subsection was inserted into an included source while keeping the old aux file. The source signature should reset the solver and prevent use of stale coordinates.

1.2 Last section

Final body after the include.
